

Allen Joel Neuringer
Professor of Psychology

Academic Degrees:

B. A. (summa cum laude), Columbia College (1962)
Ph.D., Harvard University (1967)

Fellowships and Grants:

Principal Investigator, National Institute of Mental Health Research Grant MH 068259
(2004-2008)

Principal Investigator, National Science Foundation Research Grant #IBN-9317923,
"Reinforcement and Control of Behavioral Variability" (1994-1998)

Principal Investigator, Medical Research Foundation Grant, "Learning, Mental Health,
and Controlled Variability" (1992-1994)

Principal Investigator, National Science Foundation Research Grant #BNS-
8707992, "Reinforcement and Control of Behavioral Variability" (1987-1991)

Project Director, National Science Foundation College Science Instrumentation Grant
#CSI-8551632, "Core

Reasons to respond randomly. In Zentall, T. & Wasserman, E. (Eds.) *Comparative Cognition: Experimental Explorations of Animal Intelligence*. Oxford University Press, in press. (Jensen, G., Miller, C., & Neuringer, A.)

Reinforced variability in animals and people. *American Psychologist*, 2004, 59, 891-906.

Reinforced variability decreases with approach to reinforcers. Journal of Experimental Psychology: Animal Behavior Processes, 1996, 22, 497-508. (Cherot, C., Jones, A. & Neuringer, A.)

Behavioral variability in SHR and WKY rats as a

Effects of ethanol on reinforced variations and repetitions by rats under a multiple schedule. Journal of the Experimental Analysis of Behavior, 1990, 54, 1-12 (Cohen, L., Neuringer, A., & Rhodes, D.)

Aversive and neutral punishers produce autonomic and performance differences in a human learning task. Biological Psychology. 1990, 30, 203-217 (Balaban, M. T., Rhodes, D. L., and Neuringer, A.)

Personal paths to peace. Behavior Analysis and Social Action, 1988, 6, 51-56.

Response sequence learning as a function of primary versus conditioned reinforcement. Animal Learning and Behavior, 1988, 16, 8-14. (Luck, S., Colgrove.,

- Social learning by following: An analysis. Journal of the Experimental Analysis of Behavior, 1977, 27, 127-135 (Bullock, D. & Neuringer, A.).
- Autoshaping as a function of prior food presentations. Journal of the Experimental Analysis of Behavior, 1976, 26, 463-469 (Downing, K. & Neuringer, A.).
- Group behavior of rats under schedules of reinforcement. Journal of the Experimental Analysis of Behavior, 1974, 22, 311-321 (Grott, R. & Neuringer, A.).
- Learning by following a food source. Science, 1974, 184, 1005-1008 (Neuringer, A. & Neuringer, M.).
- Pigeons respond to produce periods in which rewards are independent of responding. Journal of the Experimental Analysis of Behavior, 1973, 19, 39-54.
- Extinction in the presence of free food. Psychonomic Science, 1972, 26, 267-269 (Enkema, S., Slavin, R., Spaeth, C. & Neuringer, A.).
- Responding under discrete-trial fixed-interval schedules of reinforcement. Journal of the Experimental Analysis of Behavior, 1972, 18, 187-199 (Schneider, B. & Neuringer, A.).
- Magnitude estimation of loudness with a minimum 24-h interstimulus interval. Psychonomic Science, 1972, 27, 243-245 (Schneider, B., Neuringer, A. & Ramsey, D. 24-h inters:
